

## WORLDWIDE RECOGNISED HOLMEN PELLET DURABILITY TESTING

# HOLMEN®

strength in pellet durability

The Holmen range of Pellet Testers provide a versatile means of Durability Testing for animal feed pellets, wood pellets and many other types of pellets. The Holmen range consists of 4 models.

### HOLMEN® Ligno-Tester

Suitable for Wood Pellets

The Ligno-Tester is the latest addition to the Holmen range of Pellet Durability Testers and is aimed specifically at Wood Pellet Producers wishing to conform to the European Pellet Council ENplus Certification, which is based on the EN 14961-2 European Standard.

- Simulates the pellets transportation environment from mill to boiler.
- Provides the ability to manually calculate both Mechanical Durability (DU) and Fine Material Amount (F)
- Versatile and portable to enable transportation around different testing locations.
- Fast and Simple operation.
- 30 Second Fine Material Amount (F) test cycle.
- 60 Second Mechanical Durability (DU) test cycle.
- Fines and dust are removed during the DU test cycle resulting in no further sieving being required.
- Fitted with 3.15mm diameter (1/8") Perforated Hopper.

More details available at : [www.holmenwood.com](http://www.holmenwood.com)

### HOLMEN® NHP100

Suitable for Animal Feed Pellets

- Simulates the pellets transportation environment from mill to trough.
- Provides the ability to manually calculate the 'Pellet Durability Index' (PDI).
- Versatile and portable to enable transportation around different testing locations.
- Fast and Simple operation.
- 30, 60, 90 and 120 Second timer test function.
- Fines and dust are removed during the testing sequence.
- Fitted with standard 2.5mm diameter Perforated Hopper.
- Optional extra sizes of Perforated Hoppers.
